

Migration Happens

Sense of a Goose

- As each bird flaps its wings, it creates an uplift for the bird immediately following.
- Geese honk from behind to encourage those up front to keep up their speed.
- When a goose gets sick or is wounded, and falls out of formation, two other geese fall out with that goose and follow it down to lend help and protection.

**Let us celebrate our immigrant heritages
of the past and future!**
